

U.S. Patent Application Serial No. 10/723,453  
Reply to Office Action dated June 30, 2005

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A bobble head doll shaker, comprising:
  - a base;
  - a motor,
  - a bobble head doll support;
  - an agitation assembly including an agitator driven by the motor and imparting a shaking motion to the bobble head support, and
  - interchangeable agitator elements having different profiles, imparting different motions to the bobble head doll support.
2. (Original) A shaker according to claim 1, wherein the agitator comprises a rotating agitator engaging the bobble head support
3. (Original) A shaker according to claim 2, wherein the agitator engages an underside of the bobble head support.
4. (Original) A shaker according to claim 1, wherein the bobble head shaking motion has a frequency of 20 to 50 cycles per minute.
5. (Original) A shaker according to claim 1, wherein the bobble head support comprises a damping element.
6. (Original) A shaker according to claim 1, wherein support comprises a rounded footprint.

7. (Original) A shaker according to claim 6, wherein the support comprises a round footprint.
8. (Original) A shaker according to claim 1, wherein the bobble head support and the base comprise complementary alignment elements.
9. (Original) A shaker according to claim 1, wherein the shaking motion is variable.
10. (Currently Amended) ~~A shaker according to claim 1,~~  
A bobble head doll shaker, comprising:  
a base;  
a motor,  
a bobble head doll support platform;  
an agitation assembly including an agitator driven by the motor and imparting a shaking motion to the platform;  
wherein the platform is pivotally connected to the base.
11. (Currently Amended) A shaker according to claim 10, wherein the bobble head support platform comprises a releasable latch opposite the pivotal connection.
12. Cancelled.
13. (Original) A shaker according to claim 1, further comprising an actuator.
14. (Original) A shaker according to claim 13, wherein the actuator comprises a sound activator.
15. (Original) A shaker according to claim 1, further comprising a speed control.
16. (Original) A shaker according to claim 1, wherein the speed control comprises a

theostat.

17. (Currently Amended) A shaker according to claim 1, wherein the platform support comprises a raised element positioned to engage and lift a portion of a bottom of a bobble head doll.
18. (Original) A shaker according to claim 17, wherein the raised element comprises a nonskid surface.
19. (Currently Amended) A shaker according to claim 1, further comprising a damper on the platform support engaging the base.
20. (Currently Amended) ~~A shaker according to claim 1, wherein the agitation assembly comprises~~

A bobble head doll shaker, comprising:

a base;

a motor;

a bobble head doll support;

an agitation assembly including an agitator driven by the motor and imparting a shaking motion to the bobble head support and interchangeable agitator elements, and wherein the motor is variable speed.

21. (Original) A shaker according to claim 20, wherein the bobble head doll support comprises a platform pivotally connected to the base.
22. (Original) A shaker according to claim 21, further comprising a lift element mounted to the platform.
23. Cancelled.
